[Test] Remote Work is Here to Grow! Free 120 page Market Study for Download 1 message

Julien Uhlig <mail@sendfoxmail.com>

Wed, Oct 27, 2021 at 3:53 PM

Reply-To: Julien Uhlig <j.uhlig@exventure.co> To: Julien <j.uhlig@exventure.co>

Dear Julien,

We are feeling how life has changed since Covid- How Remote work has become the new normal. If you find out more- Here is the pre-release of our market study 2021.- The past year was one of the monumental shifts.... You can download it right here: DOWNLOAD FREE

As we are looking at new remote life-work concepts- maybe this is interesting to you as well.

As 2021 begins to come to an end, it's clear that the shift towards remote working will remain. Companies continue to be hesitant around bringing employees back in full-time, and employees are similarly reticent to come back to the office. Nevertheless, working remotely offers many benefits, and many trends have emerged in its wake, signaling its popularity. Remote work trends in 2018 and remote work trends in 2020 have seen a dramatic increase globally. As lockdowns continue and offices remain closed, there is more remote working than in the years before. Remote work has also increased due to the flexibility and ease to ofers, with

in 2019, about 20.7 million US workers have started working remotely. This was strend 20,7% of label teachers in the Unit of Patient Property of the proposition. and much fault in when the plant part before the standing in machine, developed in the other machine with from some. This is expectally true in the such stongs expert with popular recognision, such as Asiata, Twitte, April, and Comple bending the storage Office. comparation, such an definite, Technic, Apolic, and Compile function that character Citi-canation, in fractionalistical linear, those, those comparation field when manufactures a around, and when a preturn, the increasing demand for work from home options review to it the above been catalystic. Wealth that figure that sat with your cutto? These are the common theorets questions that regulators providing but the work form better only printing up. Tabley, workers show when people have a good work-life balance, they become more productive at work.

Taking at level, the well-signals his exercise west consequences.

Remote W

The world witnessed a historic shift in the 2020 job market due to the Covid-19 pandemic. While some companies used to offer the ability to work from home as a perk, it has now become the norm for most businesses. By 2025, an estimated 70% of the workforce will be working remotely at least five days a month. While 2020 may be considered the year of remote work, it is just the beginning as we see the trend continuing in 2021.

To be honest, we thought changes were huge, but this is turning into a massive market opportunity.

All the best from Bali, the airports are opening so please come visit!

[Test] This Webinar will Blow Your Mind! Waste to Super Cheap Green Hydrogen-Zero Carbon in the Lead!

1 message

Julien Uhlig < mail@sendfoxmail.com> Reply-To: Julien Uhlig <j.uhlig@exventure.co> To: Julien <j.uhlig@exventure.co>

Wed, Oct 27, 2021 at 3:57 PM

Dear Julien,

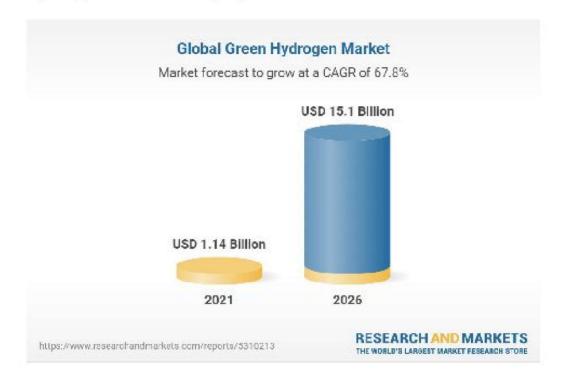

When we first started with our EX Zero Carbon Team in 2006- we received massive funding to fulfill a dream. It was to convert waste into green Hydrogen. Therefore we used steam in the reaction and not air, which brought back so many technical issues that our investors in 2013, after losing over USD 60 Mil. ran out of patience. Great news for us!

The process was far too complex, and it wasn't easy to stabilize the reaction overall. In addition, the gas prices remained low. Somehow, the idea of using Hydrogen to balance solar power for transportation in trucks and industrial processes took a lot longer to reach mainstream than we thought possible.

VIEW THE WEBINAR NOW!

Now Green Hydrogen is the big hype! Everyone is talking about it, and governments cannot spend money fast enough on research and infrastructure. The hope behind this is a high-quality fuel that can easily be generated from access to solar energy and efficiently converted back into electricity. The incredible thing is that this market is still in its early phase, and this breakthrough is putting Zero Carbon into a pole position for the small and mid-scale market.

Especially the oil and Gas industry likes this idea since potentially existing infrastructure such as gas pipelines could find additional usage. Now, why are we not doing it yet?

The simple reason is that Green Hydrogen currently is still simply too expensive. Also, there are no trucks available in large quantities, and most Hydrogen is generated from fossil fuel, so the Greenhouse Gas emissions are terrible. So what we need is a cheap, decentralized hydrogen infrastructure! Now here is where as crazy as it sounds, we have a solution right here.

Watch in this week's Webinar how Michael Hofmeister, CTO at Zero Carbon, is generating 40% Hydrogen straight out of the reactor with the worst fuel possible. With another 14% of Carbon Monoxide (CO) converted into Hydrogen as well, we have just become a decentralized Green Hydrogen Processor- the best part. We can produce cheaper than any other process because, in general, we get paid for the waste treatment with a so-called tipping fee.

These results are an absolute Game-Changer, and we are reaching out for peer review right now. The laboratory tests in this webinar were done in a universitymonitored program. Otherwise, I would myself have issues believing, but it happened, and it's big.

Enjoy this webinar, trying to find the right words and make the importance of this breakthrough more understandable.

We are glad we had this little chat. Please let us know what you think! Check out EX Venture our Parent Fund getting ready for a very limited investment opportunity. https://wefunder.com/ex.venture.inc

Best wishes from Lockdown Bali!

[Test] Vacation Time is Startup Time- GEMINI ONE Featured in Luxury Villas and Wefunder

1 message

Julien Uhlig < mail@sendfoxmail.com> Reply-To: Julien Uhlig <j.uhlig@exventure.co> To: Julien <j.uhlig@exventure.co>

Wed, Oct 27, 2021 at 3:54 PM

INVEST NOW: GEMINI ONE – Making Luxury Boat Living Sustainable, Beautiful and Affordable

Dear Julien,

Yes! Zero Carbon Funding Campaign is off for a few more weeks. Time to develop great Waste2Hydrogen Technology, finish Our Pilot Project in Indonesia and File some Government Grants.

But also: Vacation time is start-up time! What do you do after you finish the successful campaign and have two weeks off to launch another company? No, I mean it; what could be more fun and exhilarating than doing something you genuinely love. For the readers who have known me for a while, you know that I've always been an artist at heart, and maybe too creative and impact-driven, for my good. I know I can be preachy, extremely persistent, and kind of a pain. But having created the X Venture, it is a fantastic opportunity to use our

resources to launch products and services that I never thought possible. Over a year ago, we were awarded the German government contract to integrate more solar systems into Innovative transportation and living Concepts. When we finally got the approval, we had to admit that the initial scooter Market we were looking for has already been fully covered by the Chinese and leaves very little space for growth and USP.

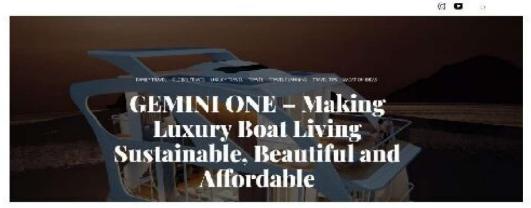

THE GEMINI- THE TESLA MODEL 3 OF LIVING BOATS

So we have been looking around where we can create more sustainable living experiences. After 26 years of living on the road, one thing that has always bothered me is generally the way we live. The way we built and constructed homes, especially here in Southeast Asia, still amazes me at the time. From the perspective of someone who has spent the last decade decentralized energy systems, the way we built cities is super inefficient, super costly, and outdated. But as radical as I sometimes can be, I totally understand that we cannot just rip everything out; cities have grown over centuries, they have a legacy that takes up keeping and everything else.

TRAVEL LUXURY VILLAS

AFTER FORBES AND TECH TIMES NOW LUXURY VILLAS

Who says Clean technology can not be sexy???

INVEST NOW IN GEMINI ONE

Today there has been a significant change over the last decade that I've been involved in; we can generate electricity, produce drinking water, treat waste dreams cheaper on a decentralized basis than we can on a city scale. Housing prices have gone up so much that I truly believe at this point that we can build floating homes even in the most beautiful beach locations in the world, cheaper than living in a crappy two-bedroom apartment in New York City. Covid has brought us to Bali; we simply did not want to be stuck in Singapore, with a small family, doing the most prolonged epidemic in human history. Can we move to this little Beach location, with maybe five thousand people, and find the ultimate quality of life at a fraction of the cost they used to spend in New York City, for example.

But it's not just us, so many people working part-time in their offices now can take months or years off, we're from anywhere in the world, why would you pace yourself and those overhyped, overpriced Financial capitals, you can put your apartment on Airbnb and live in parts of the world like body like a king.

Not saying Everyone should move out to Bali. But maybe join us on a beautiful GEMINI ONE in one of the best beach locations in the World.

Also, EX Venture is days away from our First SEC Filing! Yes! It is going really well. You can check out the campaign right here! Wefunder

GEMINI ONE ON WEFUNDER

EX VENTURE ON WEFUNDER

GEMGEMINI ONE - Making Luxury Boat Living Sustainable, Beautiful and AffordableINI ONE - Making Luxury Boat Living Sustainable, Beautiful and Affordable

SUCH A GREAT ARTICLE-PLEASE CHECK IT OUT!

GEMINI ONE is asking us to reconnect with nature and rethink how we live in major cities all over the United States. Asking the question, if there is not a more sustainable or healthy connected way of living, and if luxury ocean living, because of the price drops in solar and energy storage, can be achieved now cheaper than living on land.

GEMINI ONE is doing nothing less than building the Tesla Model S of the sea, a fully electric living home with 1600 square feet that changes how we live, perceive nature, and saves his money.

Can luxury living on the ocean be cheaper than on land? That is the question EX Venture, the US-based Bali-operated investment company, is posing with their beautiful design of the GEMINI ONE floating home concept. The fully solarpowered luxury home with 1600 square feet of living space is fully sustainable, zero-emission, and challenging the status quo of sustainable living. Read More>>>

julien, absolutely a mazing! Big Thank you.! can't believe that just hours after we spoke, I am in direct contact with and asked to share our pitch with investors such as Breakthrough Energy Ventures, Engie, SET Ventures, ETF Partners, Inven Capital, Terra Venture Partners, and others. Your network, passion, and energy are unbelievable!

JAN CHRISTIAN SIVERTSEN CEO- DESER CONTROL

Super impressed by the highly engaging format, and the high-quality production - not to mention the featured companies that truly can make the world a better place and which totally merit a global investor & partner audience. Great momentum, great people, great companies - and so much fun too. Looking forward to the next episode - this defines a new standard in fundraising and investor 'education':)

REMY DE TONNAC PARTNER- ETF PARTNERS

What an exciting, educational, and entertaining event! It is very encouraging to see so many compelling companies addressing our biggest problems with innovative solutions. And these were just the companies coming out of Germany. Thank you for pulling them all together and for the optimism and positive energy, the event engendered.

STEVEN BERKENFELD INVESTMENT LEGEND

"EX-VENTURE NIGHT is the only truly global event connecting start-ups with investors and mentors. Greentown Labs is very proud to be a partner, many of our start-ups have truly benefited from this fantastic event."

About Wefunder

We help anyone invest as little as \$100 in the startups they believe in. We're also a Public Benefit Corporation with a mission to keep the American dream alive. We aim to help 20,000 founders get off the ground by 2029.

Wefunder Inc. runs wefunder.com and is the parent company of Wefunder Advisors LLC and Wefunder Portal LLC. Wefunder Advisors is an exempt reporting adviser that advises SPVs used in Reg D offerings. Wefunder Portal is a funding portal (CRD #283503) that operates sections of wefunder.com where some Reg Crowdfunding offerings are made. Wefunder, Inc. operates sections of wefunder.com where some Reg A offerings are made. Wefunder, Inc. is not regulated as either a broker-dealer or funding portal and is not a member of FINRA.

Company Name is testing the waters to evaluate investor interest. No money or other consideration is being solicited; if sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and, then, only through Wefunder. Any indication of interest has no obligation or commitment of any kind.
